That there is at all times at least of one second foot of water per second of the time which flows past the Dam of George P. Low and from which he draws for about 6 acres of land located in Section 28 South of Range 7 West of Salt Lake Meridian, that he has free and undisturbed right to any and all of this water at any time during the season of irrigation that this stream of water has never been in litigation or dispute that each owner tak from the slough at various points and then by the time the next user's dam is arrived at there is spring water and seepage water for all the requireme This has been so for all the times past and no doubt will so continue as th conditions are exactly as they have been from the above period of time at lease.
